

## Consulting and Design

Vietnam Computer Aided Design Ltd. is formed by a group of great engineers. Our staffs are qualified engineers with B.Sc., M.Sc. and Ph.D. degrees from many developed countries in the world such as USA, Canada, Australia and Germany. Many of us have several years working in consulting and software development companies from those countries.

**SKILLS:** We have successfully involved in hundreds construction and geotechnical projects. Vietnam Computer Aided Design Ltd. specializes in structural and geotechnical engineering. We are committed to delivery high quality report/design.**TOOLS:** At Vietnam Computer Aided Design Ltd., we use cutting-edge technologies: i) latest CAD software programs and ii) most updated equipments. Our engineers are trained at least 6 months before getting involved in a real project. The following software programs are used: AutoCAD, SAP 2000, STAAD PRO 2006, Geo-Slope, SoilVision, etc. Besides, we have been developing a number of civil engineering computer programs for concrete & steel structures, shallow & pile foundations and retaining wall structures. **LOW COST:** Pay rate for consulting and design work in Vietnam is much lower than that in developed countries such as USA, Canada, Australia, Germany, etc. We are the leading company in Vietnam in Civil Engineering Outsourcing. We can do the following work: 1. Drafting (2D and 3D) 2. Design all kind of constructions including steel towers 3. Software development 4. Website development Please work with us and you will be very happy.
